

How to make a peg doll – page 1

The photographs below show how to make a peg doll.....but by using a piece of card instead of a wooden peg. However the steps are basically the same if you do have a wooden dolly peg which you can use. Follow the steps from top to bottom one column at a time.

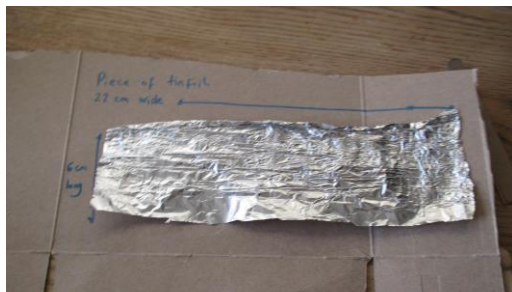

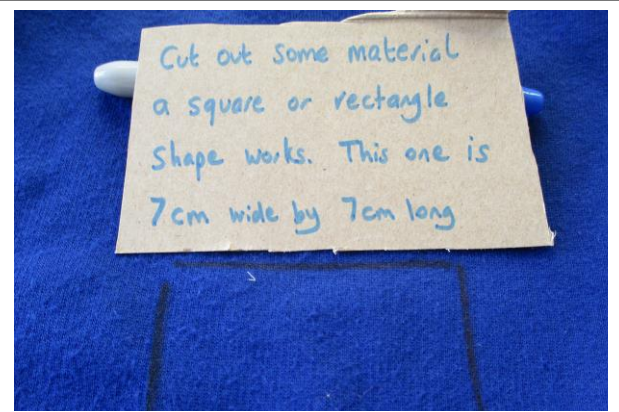

Get a piece of card board

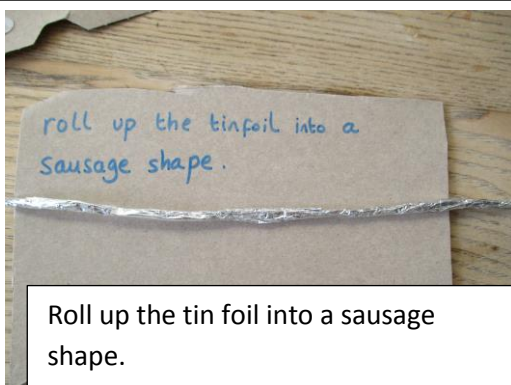

Secure the tin foil by making a loop at the back of the piece of card

Draw the shape of a dolly peg and cut out. The size is approximately 11cm long by 1.5 cm wide.

Cut out a piece of tin foil approximately 22cm wide by 6 cm long

Roll up the tin foil into a sausage shape.
